Data Science Career Track

Guided Capstone Step 6

Criteria	Meets Expectations	Points
Completion	- Documentation with detailed information on below topics - Problem statement - Data Wrangling - Exploratory data Analysis - Model Preprocessing with feature engineering - Algorithms used to build the model with evaluation metric - Winning model and scenario modelling - Pricing recommendation - Conclusion - Future scope of work - Documentation includes graphics such as charts and plots	/4
Process and Understanding	- Relevant charts/plots/maps used to depict the data in the most intuitive way - Insights/trends have been drawn from the data and appropriate recommendations provided - Model/metrics methodology clearly explained - Scenario modelling completed appropriately - Valid conclusions/recommendations/future scope of work	/4
Presentation	- Concise Documentation - Documentation has proper flow, right format, and a story - Documentation provides detailed explanation of the project	/2
Total	7 <= Points: Pass 7 > Points: Needs More Work	/10
